TIMES NEWS NETWORK

Patna: Construction work on the new terminal building is underway and the Jayaprakash Naravan International Airport in the city is likely to get a complete makeover with a futuristic design and modern facilities by March, 2023.

According to the Airports Authority of India (AAI), the development works are being carried out at an estimated cost of Rs 1.216.90 crore. It is one of the country's fastest

FINGERS CROSSED

growing airports in terms of annual passenger growth in the last five years.

The modernization project includes construction of new terminal building, cargo complex, multi-level car parking (MLCP), air traffic control-cum-technical building, fire station and apron with 14 aircraft parking bays.

Once the work is comple-

ted, the annual handling capacity of the airport will be increased to 8 million passengers per annum with total area of 7,00,000 sqft. The terminal building will have the departure lounge on the first floor and arrival area on the ground floor.

The upcoming building will be equipped with 52 check-in counters, in-line baggage handling system, five conveyor belts for arriving passengers and five aerobridges and interiors depicting the art and culture of Bihar. The provision of commercial space of 62,000 sqft has also been kept for world-class shopping facilities for pas-

sengers' delight. A G+5 MLCP building in 3 lakh sqft area would manage 750 passenger vehicles and top floor will be for commercial purpose. The parking will be connected with the departure level of the new terminal building through link bridge for pedestrian movement.

Modernisation of '20-25% of cured patients have weak or no Covid-19 antibody'

Some Recover Before Ideal Time For Antibody Development: Doc

Faryal Rumi

Patna: AIIMS-Patna doctors have found that around 20-25% of cured patients did not develop antibodies against the Covid-19 virus or it was less than the required level, which can protect them from reinfection.

The randomised finding came to light after a group of 400 cured patients, who had voluntarily come forward to donate convalescent plasma, were tested using the IgG Elisa Test, to detect the presence specific antibodies against SARS-CoV2 virus.

AIIMS-Patna experts observed that there is a stark difference in the Immunoglobulin G (IgG) level in mild, moderate, critical and asymptomatic Covid-19 recovered patients.

"Of the 400 cured patients, around 80-100 did not show the presence of specific antibodies against the virus or it was less than 1.12 AU (arbitrary unit)/ ml," said Dr Sanjeev Kumar, nodal officer for Covid-19 at AIIMS-Patna.

As per ICMR-Delhi guideline, cured people having a minimum of 1.12 AU/ ml antibody can donate blood for the convalescent plasma therapy. Antibodies guard against repeat infec-
